SOUTH ASIA CLEAN ENERGY FORUM

SACEF 2024

Engage. Act. Solve.

Home to more than a quarter of the world's population and as one of the fastest developing regions globally, South Asia faces the twin challenge of meeting its growing energy demand sustainably while also building resilience against its distinct vulnerability towards climate change.

South Asia has unique energy challenges, including high population density, economic diversity, and varying levels of development. How the growing energy demand is met in South Asia will have significant implications for the global transition towards clean energy. Accelerating clean energy deployment in the region will boost industry, create new markets, and lead to increased regional trade and economic growth.

SACEF Explained

SACEF is the flagship event of USAID/India focused on clean energy transition in South Asia with an emphasis on action-oriented discourse. SACEF 2024 will bring together key government officials and senior energy experts from the region as well as from across the world.

The theme for the forum is **Engage, Act, and Solve.**

- **Engage:** Meet energy leaders and decision makers.
- **Act:** Identify clear actions for achieving clean energy goals.
- **Solve:** Be part of the solution.

Who should attend SACEF

The South Asia Clean Energy Forum 2024 is designed for a diverse group of stakeholders involved in the clean energy sector like:

- **Government Ministries, and Agencies**
- **Public Sector Undertakings (PSUs)**
- **Development Partners**
- **Financial Institutions**
- **Private Sector/Industry**
- **Energy Experts and Practitioners**
- **Researchers, Academics, and Think tanks**
- **Civil Society Organisations**

Why you should attend

SACEF will provide a platform for diverse stakeholders to meet, share knowledge and ideas, and strengthen collaboration. Here are some compelling reasons to attend:

- **Be part of the change:** Meet potential partners and decision-makers to move the clean energy agenda forward.
- **Collaborative problem-solving:** Regional collaboration is key to accelerate the clean energy transition.
- **Meet decision-makers:** Network with key players and stakeholders from South Asia.

About South Asia Regional Energy Partnership (SAREP)

SAREP is the regional energy program of the United States Agency for International Development (USAID) India. This five-year initiative (2021-26) improves access to affordable, secure, reliable, and sustainable energy across six South Asian countries - Bangladesh, Bhutan, India, Maldives, Nepal, and Sri Lanka - in line with these countries' climate and clean energy priorities.

MARK YOUR CALENDARS

October 21-24, 2024

Hyatt Regency Mansarovar
Jaipur, Rajasthan, India

Pro tip: We are working to give you an experience where you can unwind, immerse in learning, and explore local culture. To make the most of it, we suggest you also bring those smart casuals along with formals!

Follow the SAREP handles on social media and stay tuned for exciting updates on speakers, sessions, and more.
